### Manufacturer:

CalPortland Company  
2025 E. Financial Way  
Glendora, CA 91741  
626.852.6200  
[www.calportland.com](http://www.calportland.com)

### Product Description:

Type IL cement utilizes a Type I clinker interground with calcium carbonate and gypsum to produce a portland-limestone cement. Type IL cement is lighter in color due to both chemistry of the raw ingredients used for manufacture and interground calcium carbonate.

### Product Applications:

Concrete Masonry Units  
Architectural Precast Products  
Custom Color Stucco Blends  
Ready Mix Concrete  
Precast Concrete

### Benefits:

Type IL cement is a light colored cement formulated for use in normal and architectural colored applications of masonry, concrete, precast and plaster products. Type IL portland-limestone cement reduces the amount of CO<sub>2</sub> in the manufacturing process as compared to common ASTM C150 cements by approximately 9 percent while maintaining product performance requirements.

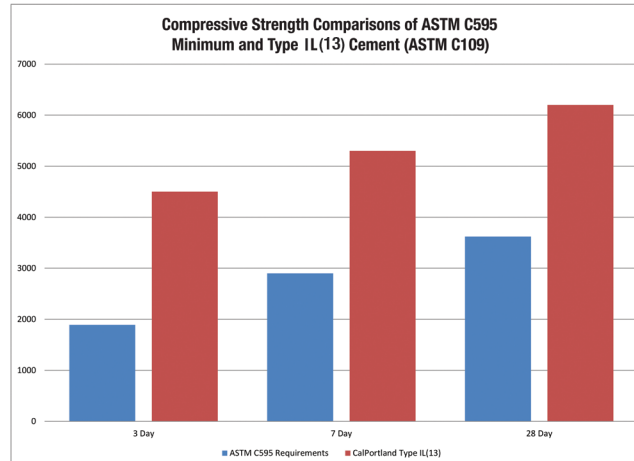

### Quality:

Established in 1891, CalPortland is proudly advancing into its second century of providing unsurpassed quality, with a full product line of superior performing cement products and solutions for your greatest construction challenges.

From our state-of-the-art cement production facilities we manufacture product using only high quality raw materials and strict quality control procedures. CalPortland is recognized as the leader in quality cement production and innovation.

# Type IL(13) Cement

## Concrete Masonry, Architectural Concrete Products, Ready Mix and Precast Concrete

### Standards:

Type IL cement conforms to the requirements of ASTM C595 and AASHTO M240 for Portland-Limestone Type IL cement.

Type IL cement complies with requirements for masonry construction materials as outlined in the International Building Code 2103.1 for Masonry.

### Product Precautions:

Type IL cement is not for use in areas subject to sulfates in soils. For precise product application it is important to refer to the project specification.

Contact with cement (including unhardened concrete, mortar, wet cement, or cement admixtures) can cause skin irritation, severe chemical burns, or serious eye damage. Avoid contact with eyes and skin. Seek immediate medical attention if you have persistent or severe discomfort. In case of eye contact, flush with plenty of water for at least 15 minutes. Consult a physician immediately.

For other precautions please refer to the CalPortland Portland Cement SDS Report.

### Availability:

CalPortland Type IL Cement is available in bulk quantities at: 19409 National Trails Hwy. Oro Grande, CA 92368

Sacked products are available through select building suppliers.
